Mr. Phil Bobel
U.S. Environmental Protection Agency
Region IX
215 Fremont Street
San Francisco, CA 94105

Dear Mr. Bobel:

This letter is written in response to concerns expressed by the Regional Water Quality Control Board staff at a recent meeting here at the BKK West Covina Landfill. Specifically there was concern about an area at the landfill where runoff water is entering a storm drain near Azusa Avenue. The primary source of water here is runoff from landscaping sprinkler systems, supplied with domestic (city) water.

We have indicated that we plan to address this situation when other more pressing issues have been resolved.

Our plan is to channel runoff into an approved storage vessel. The vessel will be pumped as needed by a vacuum truck, and disposed of in an approved manner. We expect to have this plan implemented by March 30, 1985. We will submit a detailed plan for interception, storage and disposal of the runoff water by January 30, 1984.

If you have any questions, please call me at (818) 810-1085.

Very truly yours,

Thomas E. Nuckols
Director of Landfill Engineering
